Method of assessment:	Practical observation and questioning, building up a portfolio externally verified by NPTC.	
Performance Points	24	28
Date of final examination:	Coursework only	

The vocational courses delivered at The Warriner School Farm help to develop a wide range of personal, social and work-related skills. The aim is to increase the student's confidence, provide new experiences, help the student to move on to a higher level of education or work based learning, as well as to provide the student with an industry recognised qualification. The courses are ideally suited to those students who would benefit from learning via a vocational route and who learn best in a practical situation.

These courses are most suited to those students requiring Individual Education Programmes. Achievement is based on the candidate's practical ability, together with their accompanying knowledge of the subject and Health and Safety requirements and implications.

The units we are able to offer are:-

Entry Level 2

Improve personal manner and conduct
Identify hazards in familiar settings
Make a familiar journey safely

Working towards goals
Working as part of a group
